

# A TASTE OF *Scotland*

Welcome

Welcome to our new Taste of Scotland Food Guide. After the huge success of our first edition, released in 2022, we are back with a new updated version which now includes over 80 Scottish producers from all over the country.

It has been our aim for several years to reduce our environmental impact and one of the biggest ways to achieve this, is by reducing our food miles. This guide gives you some insight into, not only our own journey towards change, but also our host of fantastic Scottish suppliers.

We are proud to say that we are only 7.5% away from our target of 50% of products being from local suppliers. As part of our strategy to achieve the 50%, we embarked on a local & sustainable producer field trip to Sam’s homeland, The Isle of Mull in April 2023. During this trip, 7 of the Lomond team and a handful of customers visited 5 producers on the island, including Tobermory Fish Co and Isle of Mull Cheese. The trip was a great way of hearing first-hand accounts of the producer’s sustainability credentials and resulted in the producers being listed on various customers menus. You can read more about these businesses throughout this guide.

We’re extremely proud of our ongoing commitment to reducing our impact on the environment and have outlined other ways in which we do this in our Sustainable Business spread. One of the highlights is the installation of 270 solar panels onto our warehouse roof, resulting in them generating 18% of our electricity requirements. Read more about our journey on pages 4 & 5.

Throughout this guide you will not only find product listings per supplier but also profiles on each one, explaining who they are and what positive changes they have made and continue to make in their sustainability journey.

Similar to our last edition we have featured the ‘Backhaul’ symbol throughout, highlighting the 25% of suppliers that are backhauled to our Glasgow depot, giving you an extra environmentally friendly option.

As always, our guide is user friendly with all Vegan, Vegetarian and Gluten Free products easily identifiable by the symbols next to the product name. You will also find an alphabetical supplier list at the back as well as a full product list by range, so you can see what you need at a glance.

We are always working to improve our literature so please feel free to contact us with your feedback on this guide. If you have any queries, you can speak with your sales rep, or get in touch with us using the contact details on page 135.

We hope you find this guide useful and we look forward to hearing your feedback.

# SUSTAINABLE BUSINESS

We are committed to reducing our impact on the natural environment and taking action on climate change. We believe that, growth which takes account of our environmental impacts, is the only way to deliver sustainable returns, as encapsulated in our vision to grow our business, whilst decoupling our environmental footprint from our growth and increasing our positive social impact.

Our Company Environmental Policy is the foundation on which we have built and continue to build our Environmental Management Systems and controls. The policy has been prepared after serious consideration of all the company aspects, including the full life cycle from farm to final customer, and the resulting environmental impacts. Without the knowledge of where we are we can never create the plans that move us forward to where we want to be. We are committed to making continuous improvements in the management of our environmental impacts. We work in partnership with others to promote environmental stewardship across our value chain, increase understanding of environmental issues amongst our stakeholders and encourage good practice with other companies.

We recognise that commercial sustainability depends on environmental and social responsibility and commit to protecting the environment, preventing pollution and continual environmental improvements. Our Environmental Management System provides us with an effective means for identifying, managing and realising environmental improvements and is able to adapt to the dynamic nature of our business and is based on the requirements of the ISO 14001: 2015 Standard.

This section of the guide gives you some insight on some of the changes we have made and continue to make, to help reduce our environmental impact.

## LOCALLY SOURCED

Our mission is to have a food system based around quality locally manufactured products and short circular local sustainable supply chains. We work in various ways to achieve our mission, these include working closely with our current local suppliers and giving them the platform they need to promote their products, this ranges from, presenting to our sales team and customers at monthly sales meetings and presentations, opportunities to exhibit at our annual trade show, Taste @ Lomond, promotional RaRa days and much more.

## SOLAR PANELS

Since 2020 100% of our electricity is sourced from renewable energy. To further improve our energy consumption, we had 270 Solar PV Panels fitted to our warehouse roof in April 2023. This has seen them generate 18% of our electricity requirements, additionally, panels will also be fitted to our warehouse extension which will add a further 15% to the total energy coming from renewable sources.

## DELIVERY FLEET

Our 32 delivery trucks are fitted with hybrid refrigeration, thinner insulation and more carrying capacity with no reliance on red diesel, resulting in 72 tonnes of CO2 saved annually.

## COMPANY CARS

All 17 of our company cars are fully electric, with the electricity supply generated from fully renewable sources.

## STAFF ENGAGEMENT

We have created a culture where all employees are aware that they have a role to play in the successful delivery of environmental improvements, and we achieve this by embedding our standards and educating our staff through training, awareness, policies and procedures followed by continuing encouragement to always employ environmental best practice. Our environmental policy is included as part of the Induction process for all new personnel to ensure that they begin their Lomond journey fully aware of our commitment and their responsibility.

We provide recycling facilities throughout the site and informational posters to raise awareness.

Our Managing Director and his environmental Green Team have completed formal, certificated Environmental Awareness Training and this is rolled out to all staff.

All staff know that they can discuss any issues or concerns with any Director or Manager at any time without the stifling constraints of 'making an appointment'. The open-door policy is actively encouraged throughout the business and the Senior Managers are based in the open plan offices with their teams.

## EXTENSION

Our 12,000 square foot warehouse extension is now underway with a completion target of Summer 2024. The roof of the extension will also be fitted with Solar PV Panels, adding a further 15% the total energy coming from renewable sources.

## CO2 PLANT

We are in the process of replacing our current ammonia plant that runs our freezer and chills with a new state of the art CO2 plant, this will reduce our energy consumption by approximately 35%, giving us a clean system with minimal environmental impact.

## ACCREDITATIONS:

- BRC AA
- ISO 14001 (Environmental Standard)
- ISO 45001 (Occupational Health & Safety Management)

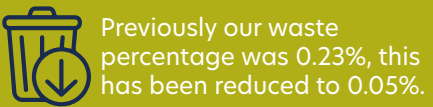

## BACKHAUL

We currently backhaul products from 25% of our Scottish suppliers, resulting in less food miles and trucks on the road. Look out for the backhaul icon throughout the guide.

## FOOD WASTE

We are committed to ensuring we deliver zero food waste and have implemented a food waste policy and appointed a food waste champion. Our policy is to ensure anything within 2 days of the end of its shelf life and cannot be sold is donated to charity. Some of the local charities that benefit from this are Possibilities, Kindness and Men Matter Scotland.

We work with Fareshare ensuring all surplus stock from our trade show, Taste @ Lomond is donated to charity.

- Some stats from the 2023 event:
- 0.5 tonnes of food donated.
  - 14 charities helped.
  - Equivalent of 1191 meals.
  - 0.8 tonnes of co2 saved.

# CAKE

Cake is Lomond Foods very own manufacturing bakery situated in the south side of Glasgow. At Cake we love to excite and delight our customers with our passionate creativity, technical know-how and market leading innovative bakes. We eat, breath and sleep all things Cake!

Each of our Cakes is hand crafted by our skilled team which provides our customers with the baked in store freshness we all look for when out for our afternoon treat.

Whilst offering the most scrumptious goodies is the core purpose of the business, we are truly driven to reduce our impact on the environment around us. To reduce food miles, our packaging is produced by local businesses from recycled and fully recyclable materials. Where possible our ingredients are produced locally but always sourced sustainably and ethically – it is for this reason we only use free range eggs. As a manufacturing bakery, we use a fair bit of energy however, all of our electricity comes from renewable sources. This energy is also used to charge our fleet of electric vehicles. To provide our customers with extra reassurance that we take great care in what we do, Cake has BRC AA accreditation as well as ISO, Environmental and Health and Safety accreditation.

The passion of our product developer's is what drives us to challenge the market with new bakes and flavours. Some recent launches include a range of mini loaf Cakes, vegan cinnamon buns and a host of seasonal goodies.

# BROWNS FOOD GROUP

In 1885 the Browns family opened a small butcher shop in Biggar in the Scottish borders, curing all their own bacon and distributing products by horse and cart throughout Lanarkshire and surrounding areas. The Godfrey family bought the business in the late 1980's - retaining the original family core values and traditions whilst building, expanding, and developing the business into the Browns Food Group we see today. The Browns Food Group operates from seven manufacturing sites throughout the UK offering a variety of expertise and a comprehensive range of quality food products.

- CURRENT ENVIRONMENTAL CHANGES**
- Embracing new technologies - such as capturing waste heat from refrigeration systems to heat water used for cleaning, operations and offsetting energy usage
  - Reducing vehicle emissions - purchasing the most efficient haulage trucks meeting the latest EU missions targets
  - Removing black plastic from sites
  - Utilising recyclable materials in cooked meat packaging
  - Making their transport as efficient as possible - phasing out of diesel cars and replacing with electric vehicles
  - Powering their sites in the most energy efficient ways - capturing heat from steam generation & re-using energy for hot water and heating facilities.

## 2023 AND BEYOND

- Continue to look at recyclable lidding films
- Move to 100% recyclable pre formed trays
- Material reduction in corrugate and box rationalisation
- Increasing the knowledge and skills of their employees at all levels
- Creation of a Net Zero Team to focus on their aims and core sustainability policies
- Carrying out a carbon footprint assessment - where they are now and where they want to be
- Maintaining reviews of energy consumption
- Looking at their supply chains in relation to Scope 3 activities
- Company car fleet conversion to electric or Hybrid, to be completed by 2025 with over 50% already done. They have installed over 30 charging stations at sites and funded employees homes to be fitted with chargers as required.

# THE EDINBURGH BUTTER CO

The Edinburgh Butter Co produce cultured butters following traditional artisan methods, creating a butter that is deep and rich in flavour and smooth and creamy in texture, how butter used to taste when time, effort and care were put into its production.

One of the main reasons the business was started was a desire not only to produce amazing butter but also to try and displace the huge amount of imported premium butter that is sold within the UK. Reducing food miles and supporting British farmers.

All of The Edinburgh Butter Co's cream is sourced from a farmer owned co-operative. Using the best of British milk their producer focuses on the highest quality, food safety and animal welfare. All farmers that are part of the co-operative meet Red Tractor standards and are signed up to the co-operatives on-farm climate action plan. The action plan focuses on sustainability and becoming carbon net zero by 2050.

The business takes their position on sustainability seriously which is why they relocated their factory to Uphall last year. Now 100% of their heating/ hot water comes from biomass and their landlord is in the process of moving towards renewable sources for all electricity. Alongside that, The Edinburgh Butter Co have significantly reduced their landfill waste and recycle and reuse as much as possible in their processes.

# ROBERTSON'S

Scottish butchers have always been at the heart of Robertson's business, and they've been supplying them with their quality pork products for generations.

They are proud to continue this partnership, and to be Scotland's leading producer and supplier of a full range of 100% Scottish pork products. Their focus on quality and traceability makes them the supplier of choice for butchers, delicatessens, restaurants, and hotels throughout Scotland and beyond.

Now part of The Browns Food Group, Robertson's are proud to be a member of Quality Meat Scotland's Farm Assured from Scotland scheme, which is supported and approved by the Scottish SPCA.

As a top priority, they make sure that the pork comes from pigs which are reared in high quality conditions. This care allows them to deliver the best quality of product to their customers.

Their craft butchery skills and traditional recipes have been handed down through the family, and they are now the only producers of genuine Ayrshire bacon still operating in Ayrshire. Robertson's quality smoked meats are prepared in their very own smokehouse, and they only use whole cuts of pork for the sausages, with traditional recipes that ensure the succulent texture and full flavour that their sausages are famous for.

# W.W. WALES LTD

W. W. Wales is a Scottish company based in Kilmarnock, Ayrshire since the early 1960's. Dedicated staff work hard on sourcing, preparing, and delivering the best Butcher meat in Ayrshire, as well as further across Scotland. Managing director Gordon Opray hand picks only the best scotch beef from Lanark and Stirling markets and this allows the source of each product to be identified easily.

A purpose-built factory shop on the premises is open to the public, where friendly and knowledgeable staff are on hand to help with all butcher meat requirements.

Catering is also provided to many hotels, restaurants, tea rooms, snack bars, cash and carries, butchers and wholesalers all over Scotland.

# EAST COAST CURED

They may be inspired by their European friends, but East Coast Cured's range of award-winning cured meat products are uniquely Scottish in their ingredients and creation - the finest Scottish Pork from Robertsons of Ardrossan, non-Scottish ingredients sourced from Scottish wholesalers and made in a basement workshop in Edinburgh's vibrant Leith.

East Coast Cured was born from a genuine desire to celebrate the wealth of magnificent produce available in Scotland and to put our country on the map as an international contender in the production of high-quality cured meats.

From sourcing & suppliers to customers & community, supporting local has been at the heart of East Coast Cured since the beginning.

Customers shop with East Coast Cured out of a desire to support local businesses and ECC adheres to the same philosophy. The meat they use has always been, and always will be, Scottish. It's sourced from farms who are both SSPCA approved and QMS accredited ensuring the best animal welfare standards. They apply the same philosophy to their other raw materials but where this is impossible they work with Scottish wholesalers to source the ingredients that they need.

Product Selection

East Coast Cured use the UN Sustainable Development Goals to constantly monitor and improve their impact and develop opportunities and partnerships in these areas. Details of how they are meeting these goals include:

- All products are ambient, and no heating or cooling is required during the production process, or in storage - less carbon intensive than other food production processes.
- They are providing charcuterie to UK market saving on food miles when compared to imported cured meats.
- Zero Waste production targets - food waste is minimal. They use as much of the animal as they can.
- They use locally sourced ingredients.
- They require their suppliers to have the same sustainability ethos that they do.

# THE TOBERMORY FISH CO

The Tobermory Fish Company believe that the World's best tasting fish and shellfish products come from the cool, clear waters around the Scottish Hebridean Islands.

It was here, in the 1780s, that the British Society for Encouraging Fisheries decided to build a port upon a wonderful natural harbour. The name of the port was Tobermory.

Situated in the beautiful town of Tobermory is The Tobermory Fish Company. It was founded in 1971 by Hugh and Marjorie Goldie and is, today, an award winning, small, family-run business with a strong family and island heritage passed through three generations.

For over 50 years the company has been producing foods of the highest quality, using fish and shellfish from the very best local and Scottish suppliers. Hugh and Marjorie believed in a family business with a family of customers. This tradition is continued by their daughter, Rosie and granddaughter Sally, both of whom take great pride in producing outstanding foods. Their commitment that customers should taste the finest fish and seafood is maintained through the following core values.

Cold Smoked Trout Side Unsliced 1kg (61868)

- Their produce uses the best quality fish and seafood available.
- Only natural ingredients are used in processing.
- To use only sustainable resources.
- They use carefully crafted family recipes perfected over generations.
- They hand produce artisan foods of the highest quality.

The Tobermory Fish Company's overall objective is to make delicious produce that harbours the spirit of their amazing location by embracing the purity and beauty of the surrounding environment. Their selection of delicious Hebridean foods range from the World-renowned Cold Smoked Tobermory Trout to Hot Smoked Mussels.

# ISLE OF MULL CHEESE & SPIRIT

Cheese and Spirit from One Herd of Cows. Three generations of the Reade family, working on a small dairy farm, on the wild west Coast of Scotland with help from 120 cows, producing milk to make cheese and spirits.

The cheese is made from raw milk and then matured for more than a year in their Cellars. This produces a cheese with great flavour, fruity and spicy.

Generating electricity from wind and water with heat from the local forests, not wasting anything, being sustainable.

True to their principles of no waste, they are now distilling the whey from the cheese making to produce a clear Isle of Mull Spirit: Sgriob-ruadh Spirit, Coo J'N and Cheesemakers Strength 60%ABV.

The beautiful Island, the grass the cows eat and the water they drink, give a special taste to both cheese and spirits that can be found nowhere else.

36017	Isle Of Mull 1/16 (1.5kg)	Per kg	C

Hebridean Blue (38500)

Isle Of Mull Cheddar (36017)

The Reade family love people to visit them and take guided tours around the farm to get a real feel of what they do. Eat their cheese and taste their spirits in the Glass Barn Café / Farm Shop.

Net Zero ambitions: Agriculture in general has a closed carbon loop. Carbon and Sunlight with some nutrition from the soil, grows the grass and other crops. Livestock farming will increase the carbon content of soil.

The only inputs that need to reduce are the fossil fuels. Natural gas to produce the nitrogen fertilizer and diesel for the tractors. They will continue to reduce the nitrogen input, as they already use very little and when Tractors can run on hydrogen batteries, the business will produce their own hydrogen using their renewable electricity.

Reade Family Cows

The Reade Family

# GLENGORM

Glengorm farm is on the north coast of the Island of Mull, in the Inner Hebrides, the farm has been family owned and run for the last 50 years, the current owners Tom & Marjorie Nelson are passionate about food and strive to produce the highest quality meat from their farm.

They have a fold of pedigree highland cattle which produces exceptional eating beef, particular characteristics are full flavour, low fat and dark meat. The animals are slaughtered from 3 years of age and are hung for 3 weeks. The farm also has a flock of pedigree blackface sheep from which they produce hogget meat, which is slow matured lamb slaughtered around 12 - 18 months of age.

# ISLAND BAKERY ORGANICS

First and foremost, it is Island Bakery's mission to make biscuits that taste brilliant! Whilst you may have appreciated their deliciousness, it may have escaped your notice that their biscuits are organic. We hope not!

It was Island Bakery's choice to become an organic business. Organic standards ensure that all of their ingredients have been produced on land that is free from pesticides or artificial fertilizers. This is good for the ecosystems on and around the farms that have grown the wheat for the flour, or where the cows whose milk makes the butter have grazed. They can be assured that those cows will enjoy the highest standards of animal welfare. Every ingredient in the biscuits is fully traceable back to the producer.

Recent studies have shown that organic foods have much higher levels of antioxidants and other good nutrients than conventional crops, and none of the chemicals which are routinely applied to them.

131 miles  
from Lomond

BISCUITS			
CODE	DESCRIPTION	UNIT SIZE	TAGS
11321	Gluten Free Double Chocolate Cookie	24 x 40g	A V GF
62002	Gluten Free Oat & Raisin Cookie	24 x 30g	A V GF
29828	Lemon Melts	48 x 25g	A V

Choosing Island Bakery biscuits also offers you assurance that the food you eat will contain:

- No GMOs
- No preservatives
- No artificial colours or flavours
- No palm oil

Being organic is only part of the picture for Island Bakery Organics. Their factory is powered entirely with local sources of renewable energy. Electricity for the building is generated both by a hydro-electric turbine on the neighbouring Tobermory river, and a single wind turbine set on a hill above the bakery. The unique ovens are heated using local wood chip from Mull's abundant timber plantations. This is not only environmentally sustainable, but the gentle heat gives the biscuits a slow, perfect bake.

They are not claiming that biscuits are a health food, but if you want to enjoy something sweet, it might as well be the best. Island Bakery Organics do they're best for the environment, so you can enjoy their biscuits without feeling too guilty about it.

# AMITY FISH COMPANY

Led by industry leader Jimmy Buchan, star of the BBC's BAFTA award-winning Trawlermen TV series, the Amity team source only the best catch from the icy waters around the Scottish coastline using over 50 years of experience in the fishing industry. Jimmy's hands-on approach ensures nothing slips under the net.

The quality of the catch landed is not only consistently high but the onshore processing facilities are second to none. Jimmy's partners can call on highly experienced and accredited experts in processing and fish-smoking, ensuring that every piece of seafood is selected and prepared by the real professionals. Amity Fish Company is also proud to be an approved MSC supplier, keeping the chain of custody from sea to plate.

Already supplying the offshore sector with MSC certified fish, Amity is a great advocate of championing the responsible fishing scheme which is an industry approved standard that vessels need to attain. Well known within the industry, Amity provides an opportunity to seek and source your chosen seafood so that you have the confidence to promote the best Scottish seafood in your business. In buying into Amity, you are buying into a wealth of experience - let us take quality control like no other and guaranteed sustainability from our shore to your door.

# SGAIA FOODS

As a plant-based company Sgaia Foods do their best to deliver sustainable and ethical produce. Their non-GMO ingredients are sourced locally when possible ensuring that they can deliver the highest quality products from their 100% plant-based factory.

Sgaia's delivery partner offers Carbon-neutral deliveries meaning that the products embark on a sustainable journey even once they leave the factory.

Managing food waste is a priority for Sgaia. They work hard to minimise waste from off-cuts by repacking them and sharing them, and they are proud to say that they have never overstocked in 8 years of business.

Sgaia's mission is to deliver flavourful and nutritious food, made with sustainable and ethical procedures, they are consistently assessing new methods to improve their environmental footprint.

# MACKIE'S OF SCOTLAND

Mackie's of Scotland is a 5th generation family business making chocolate and ice cream on the family farm in Aberdeenshire, using fresh dairy ingredients from its own herd, powered by its own renewable energy. Since the early 2000's, Mackie's goal has been to become "a global Scottish brand, from the greenest company in Britain, created by people having fun."

Mackie's makes its ice cream from "sky to scoop" - with the sun and wind powering the dairy while also combining with the rain to grow the crops, which feed the cows, who produce the fresh milk and cream used in every tub. As early adopters of wind and solar energy, over the last few decades Mackie's has built up energy production capacity which now sees it generate more than twice as much energy as it uses - almost five times as much as it buys from the national grid.

Representing its largest single investment ever, Mackie's has over the past two years been building a £4.5m low-carbon refrigeration system in conjunction with funding and planning support from the Scottish Government's Low Carbon Infrastructure Transition Programme. With the project close to completion, Mackie's is seeing the huge benefit to combining sustainable energy production with sustainable energy use reduction.

Available in all major UK supermarkets and exported worldwide, Mackie's ice cream is a trusted and award-winning family favourite in Scotland and beyond.

# THE BUFFALO FARM

Buffalo Farm Founder and 6th generation farmer, Steve Mitchell first introduced water buffalo to Scotland in 2005 for the purpose of developing a range of buffalo meat products. Interest grew and regular requests for mozzarella led to the development of Scotland's first and only Buffalo Mozzarella which launched in July 2021.

In 2022 Scottish Buffalo Mozzarella won Best in Class at the Virtual Cheese Awards and Silver at the World Cheese Awards.

Buffalo Farm are an independent family business farming as sustainably as possible. Their herd is out to pasture during the spring, summer and autumn months. The farm make their own silage with home grown grass to feed the herd throughout the winter.

They farm regeneratively on a rotational basis, utilising all of their own slurry and dung to feed the land and allowing it time to recover between grazing. A ground source heat pump heats the state-of-the-art dairy building & water supply which reduces the energy required to generate hot water temperatures for cheese production & cleaning and Co2 emissions are further reduced by the installation of low energy lighting.

On the farm the business have switched to Agg Bag for silage production, which uses 70% less plastic than conventional bales. Agg Bag are also 100% recyclable compared to 70% bale netting.

Going forward the business will be undertaking a full farm audit as part of their journey towards net zero.

# REIDS OF CAITHNESS

Set within the historic town of Thurso at the topmost tip of Scotland you'll find a bakery which has made its mark around the world. For half a century, Reids have established not only an enduring association with their beautiful coastal home, but a global reputation for outstanding quality and taste.

A family-run business since 1966, they pride themselves on a commitment to time-honoured, hand crafted baking methods when bringing an exceptional range of Scottish favourites to life. Yet while rooted in tradition, a refreshingly innovative approach also lies at the heart of their success.

Make sure it's McGhee's!

## MCGHEE'S BAKERY

McGhees are committed to reducing their carbon footprint by taking steps to reduce unnecessary deliveries to customers. Minimum order values have been put in place for all customers.

All raw materials are chosen with a view to ensuring they are of a sustainable source and are not likely to have an adverse effect on the environment. McGhees are now a member of RSPO.

All packaging materials are reviewed to ensure that they are not excessively packaging product and are purchasing, wherever possible, from re-cycled sources. All McGhees packaging can be recycled.

All waste is handled to current legislative guidelines and waste management is handled to ensure least possible impact on the environment. McGhees recycle as much as possible to meet Scotland Zero Waste Legislation.

McGhee's Bakery is committed to carrying out all commercial operations in harmony with the global environment. They currently adhere to the following standards as part of their policy on the environment.

It is the company's policy to ensure that all uses of power are regularly reviewed to ensure that conservation of energy is optimised, and no unnecessary waste is allowed to occur.

# JOHN SCOTT MEATS

Top quality meat has been the key focus of John Scott Meat, Paisley, since 1968... when several butchers in the Greenock area asked local farmer John Scott if he could supply them direct. The request was based on their appreciation of the reliable quality of livestock which they'd come to expect from the Scott family farm.

From this simple start, John Scott Meat has grown into a business which today delivers meat to quality butchers, wholesalers and caterers throughout Scotland.

After initially working through an abattoir in Dumbarton, the business moved five years later to the company's existing location in Paisley. Then, in 1978, John Scott was the major influence in taking over the abattoir which formed Sandyford Abattoir (Paisley) Ltd., which operates today, providing a slaughtering service and, more importantly, gives John Scott Meat complete control of its product from farm to customer.

# PARS FOODS LTD

Born in the former Yugoslavian Republic of Macedonia, Branko Sarafilovic first arrived in Harwich, England in 1948 traveling as a displaced person. The following year Branko moved to lodgings in Kilmarnock where he was able to find work within his trade as a baker.

Following a lifelong ambition, Branko bought his first business in the Gorbals district of Glasgow in 1952, expanding to buy a second business in the Anderston district two years later.

The company is now run by Branko's youngest son Brian, Managing Director and Radovan, Operations Director, producing a range of savoury products and pastry cases, both finished and "Fill to Bake" for the food service market. PARS Foods sources ingredients from: JR Pearsons for meats based in Linwood, Lomond Foods for Venison based in Glasgow, McAusland Crawford for pre-mixes based in Paisley, Carrs Flour for Flour based in Kirkcaldy.

PARS hold a BRC AA Grade certification and try to use local suppliers for all ingredients where possible and all of their packaging is recyclable.

# GRANTS OF SPEYSIDE

Grants of Speyside is a long-established family business. Today, Stuart Grant is the fifth generation to carry on the tradition.

It was started in Sutherland by Stuart's great-great grandfather, John Grant, around 1824.

In the 1990's Stuart moved the business to Speyside where today, from a modern purpose-built factory, the company supplies quality hotels, restaurants and retailers throughout the highlands with fresh meat & traditional Scottish meat products including Jessie Grant's haggis & black pudding.

Grant's are developing new products with more emphasis on plant based ingredients and are also trying to move to being more sustainable whenever possible, by using recycled packaging, sourcing products from as near as possible and moving to renewable energy sources where available.

# LIONS SPECIALITY FOODS

Lions Speciality Foods are dedicated to the production, innovation, and development of Smoked fish production for manufacturing, retail, food service & wholesale industries.

It is their passion to manufacture to the highest standards and quality - their state of the art site in Central Scotland is BRC Grade A certified.

Lions Smoked salmon products are made using sustainable Scottish Salmon; cured with a blend of Salt & Demerara Sugar and then delicately smoked over oak-wood. Each process and ingredient are treated with the professionalism and care you expect; guaranteeing an authentic Scottish product that you can trust and rely on.

The Scottish Poached Salmon Log is made with salmon offcuts which would normally be wasted. This use of a by-product, usually disposed of, helps to reduce the environmental impact of processing as well as creating a delicious and versatile product.

# SANDWICH LARDER LTD

The Sandwich Larder is a small family run company, established in 2003 by Directors David & Yvonne Mackintosh with their son Fraser, joining the company in 2022. Their purpose-designed premises currently have 27 staff members who are trained to the relevant food hygiene standards to produce a range of products including Sandwiches, Wraps, Panini's, Salads, Breakfast Muffins to name a few. The Sandwich Larder are SALSA and Micron2 accredited and ensure staff work to the stringent quality procedures that are in place.

As a company they believe they have a responsibility to be environmentally conscious by ensuring that they use local suppliers as much as possible. All packaging is from safe and sustainable rain forests, most of which is fully recyclable and hospitality orders can be supplied on recyclable trays. Their delivery vehicles meet the ULEZ Emissions Standard, and they currently have 1 fully electric Vehicle which David, Yvonne and Fraser use to visit clients and attend meetings.

The Sandwich Larder hope to add more Hydrogen or Electric vehicles in the next few years, allowing them to fulfil orders without a negative impact on delivery schedules.

They continue to explore as many options as possible to ensure they are operating towards their targets of reducing emissions throughout logistics and supply chain and work towards a Net Zero end goal.

# RAW CULTURE KOMBUCHA

Raw Culture was born during the unprecedented times of the global pandemic. As the world went into lockdown, they saw an opportunity to turn a challenging situation into something positive. With the support of the furlough scheme, they dedicated their time and energy to develop unique kombucha products and build a brand that would capture the hearts and palates of kombucha enthusiasts.

Raw Culture's vision for the future is to bring Raw Culture kombucha to the mainstream, spreading the joy of gut-friendly beverages far and wide. They aim to expand our reach, partnering with like-minded businesses and stocking their products in more locations, so that everyone can indulge in the goodness of Raw Culture.

As they continue to innovate and explore new flavour profiles, they are excited to share their creations with you and be a part of your wellness journey.

# THE ETHICAL DAIRY

The Ethical Dairy produce a range of traditional cheeses made with organic milk from their own dairy herd, where they keep the calves with their mothers to suckle.

Rainton Farm is the first commercial dairy in the UK to be following the cow with calf method, demonstrating that cow with calf dairy farming is viable and sustainable at scale.

Their ethical dairy model is based around treating the animals, the land, environment, and the people who work there with respect and kindness.

Ethical Dairies scope 1 and 2 emissions are 8% of their total emissions and they aim to be net zero in scope 1 and 2 emissions by 2035.

# WALKER'S SHORTBREAD

It was over a hundred years ago that the Walker family started baking shortbread in the Speyside village of Aberlour where they remain to this day.

Joseph Walker founded the company when he opened his village bakery in 1898; now it is his grandchildren and great grandchildren that continue the tradition of fine baking that he started.

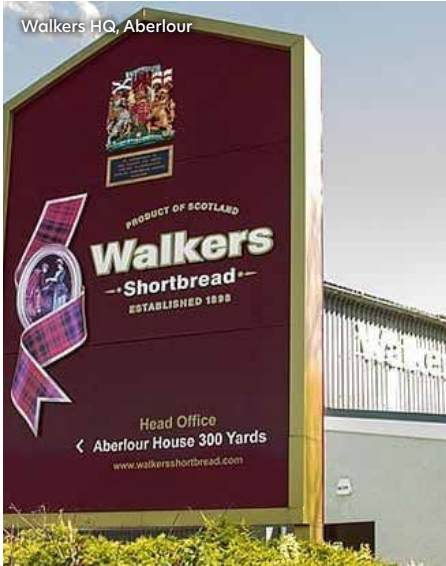

In fact, the founder's personal guarantee is still marked on every pack to confirm that Walker's products are made with only the finest ingredients obtainable. Though the Walker family have added many new products to their range during the last century, each and every one holds to those original values of quality and natural goodness.

# SCOTCH & CO

It all started in 2014 with an idea for a food business using brilliant local ingredients. One of the things Scotch & Co made and sold at farmers markets using the amazing produce available on their doorstep were handmade scotch eggs. They became so popular that they forgot all other food types existed and they became the country's leading scotch egg company.

With great taste comes great demand. Scotch & Co have since scaled up to a bigger kitchen, more equipment, and hired a brilliant team of chefs who became even more skilled than the founders in the way of the scotch egg.

Things have changed a lot since their first farmers market. The products still make a weekly appearance at Stockbridge Market in Edinburgh where the business keep locals and bemused tourists in steady supply. However, now you'll also find them at some of the biggest food festivals and events, as well as supplying wholesale and food service to a range of the country's best loved shops, deli's, cafe's, restaurants and bars with the award winning scotch eggs.

Amazingly, each one is still made the same way as their very first- by hand, with great care and great ingredients - because we know that's how the best scotch eggs are made.

# HIGHLAND GAME

Highland Game is the No1 for supply of Scottish and UK origin Venison to wholesalers, food service and retail. They continue to drive new markets and grow the appeal of Venison from Lerwick to Land's End.

Their dedicated Venison plant (BRC AA accredited) is located in Dundee at the foothills of the Highlands. They work in partnership with Forestry Land Scotland and circa 300 of the best quality private estates across Scotland. Highland Game are committed to advancing the quality standards of Venison supply in the UK and are advocates of Scottish Quality Wild Venison (SQWV) approved accreditation.

There are probably more deer in the UK now than there have been for the past 1,000 years and these populations need to be managed to keep numbers in balance with the environment.

There are currently concerns that too many wild deer will negatively affect work to increase biodiversity and impact efforts to plant more trees. Therefore, making sure deer are at sustainable levels is important in the battle to fight climate change.

Venison is a natural product of sustainable deer management and the meat produced follows strict standards in both humane practices and food production. In addition, venison is also produced in the UK from farmed deer.

Frozen Diced Venison (86608)

Christian Nissen - Managing Director

Wild Deer

The UK has extremely high standards in relation to deer management and food safety, as well as legal protections which ensures that their deer are humanely harvested. All venison must meet rigorous handling and processing requirements before it is allowed to be passed on to the consumer.

Consumers can be confident that, whether it comes from managed wild populations or farms, it is a highly sustainable and ethical source of red meat.

SAOS have been working on a report soon to be released that will define the impact of Venison on our bio-diversity and better articulate Venison as a low carbon footprint alternative to other red meats. This will enable you with confidence to switch to Venison knowing you are plating the most sustainable and nutritious Scottish red meat available to you from forest to fork.

Highland Game's aim is to work more closely with wholesalers to drive new business into public bodies thereby developing a more robust circular economy from forest to fork.

# MRS TILLY'S

Beginning as a humble, home-based venture in Tillicoultry, Mrs Tilly's has grown to become an internationally beloved confectionery brand. Founded by Peter and Elisabeth Paterson, who initially created homemade tablet and fudge in their kitchen. Now run by their sons Blair and Kier, Mrs Tilly's remains committed to quality, using only the finest local ingredients, and maintaining a handmade, batch-produced approach.

Their signature flavour is found across a wide product range, from original and uniquely flavoured fudge to the popular traditional Scottish tablet, including their latest creation, Tablet Popcorn, which takes crunchy, air-popped popcorn and drenches it in indulgent tablet sauce. Committed to inclusivity, they also offer a vegan fudge line. Additionally, all products are gluten-free, non-GMO, and suitable for vegetarians.

Mrs Tilly's take great pride in sourcing ingredients from local suppliers. The significance of locally sourced ingredients - alongside a commitment to supporting the local economy - assures a level of freshness and quality in every bite of Mrs Tilly's confectionery. This gives them the distinct flavour profile that's loved internationally.

# MILLERS LARDER

Millers Larder are classically trained chefs who are passionate about provenance, quality, innovation, sourcing and cooking seasonal ingredients.

They are artisan producers and their products are made in small batches by chefs for chefs and their customers.

Millers Larder have created award winning Perfyit Piccalilli to have a fresh unique modern day taste which accompanies a whole range of foods for your customers to share and enjoy.

Their Perfyit Piccalilli is packed full of tangy crunchy vegetables with a good set to 'sit' well, is Gluten Free and has a mellow zingy flavour. Perfyit (old Scots word) with cold meats, sausage rolls, charcuterie, cheeses, pakora, BBQs, terrines, smoked fish, sandwiches, Christmas Ham and of course... pork pies.

We hope that you enjoy the Perfyit Piccalilli as a very tasty accompaniment to your menus.

A sprinkling of carrot stars goes into every batch of Perfyit Piccalilli to add a wee bit of magic for your enjoyment. We do hope that they will find one!

# MACSWEEN

Macswen is a third generation family company established as a butchers shop in Edinburgh in the 1950's. The company has passed down through a family of natural entrepreneurs. Following in their grandfather's footsteps the family are passionate about making the best tasting foods, prioritising environmental sustainability and recognising the importance of their people and place within the community.

Using pioneering technologies to convert waste into sustainable energy, in early 2013 Macswen achieved their goal of recycling 100% of their waste, becoming among the first in Scotland to achieve this milestone. Having increased solid waste recycling to 90% between 2005 and 2010 they have been exploring ways to recycle the remaining 10%. The solution lay in a partnership with the William Tracey Group, who have championed the process of creating Refuse Derived Fuel (RDF).

# LAZY DAY FOODS LTD

At Lazy Day they have a mission: to create irresistible gluten-free, milk-free and egg-free vegan/plant-based goodies, hand-baked with love. They use the very best ingredients in their own dedicated allergen-friendly bakery - because, at Lazy Day, they think everyone deserves the occasional treat, especially when they're as joyfully delicious as theirs.

The founders, Dr Sally Beattie and Emer Bustard, are both food scientists who know first-hand all about food allergy and intolerance; they also happen to love a really good slice of cake, and that's how Lazy Day was born.

Sustainability is at the heart of everything they do at Lazy Day. They believe that the ethos of providing high quality free-from products goes hand in hand with their commitment to prioritising sustainability.

As a food producer, minimising food waste is key and their production processes continue to evolve to consistently reduce food waste. Lazy Day Foods also use sustainably sourced ingredients within their yummy products and seek to buy local wherever they can.

# THE BAY FISH & CHIPS

The Bay Fish and Chips was established in 2006 and nominated as UK's best takeaway in 2013.

They are proud winners of over 90 awards, including Catey's Sustainable Restaurant of the year. Calum and the team Bay work tirelessly to remain as one of the most sustainable Fish and Chips shops in the world.

They have their own carbon neutral plan and are aiming to be carbon-neutral by 2035, ahead of UK's goal to achieve it by 2045.

Their Fish is MSC certified, and all of the ingredients are sourced within 50 miles radius.

100% of their gas and electric come from renewable sources and all packaging is compostable. Any food waste generated at The Bay is collected and turned into compost and their used oil is recycled by turning it into bio-diesel.

# CONNAGE DAIRY

Connage Highland Dairy is a traditional family-owned, fully organic business, situated on the family farm at Ardersier. The farm was started by father Hamish Clark and continues to remain in the family. A family business in the true sense of the word, Connage is owned by brothers Callum & Cameron and their wives Jill & Eileen.

Connage Dairy pride themselves not only on their organic status but also the fact that their cows graze the fertile clover, misted with sea spray from the Moray Firth which gives their milk an extra special taste. They are equally proud of their team of cheese-makers, all from the local community, who are dedicated to producing the very best cheeses.

Animal welfare, taking care of the stunning environment surrounding the farm and ensuring sustainability are just as important as the quality of the cheese Connage Dairy make. They are situated on the farm, restricting food miles and carbon foot print by producing cheese and selling milk via on site vending. The farm and the cheese dairy are Scottish Organic Producers accredited.

All their cheeses are organic and vegetarian.

# G MCWILLIAM (ABERDEEN) LTD

April 2022 saw the takeover of G McWilliam by Robert Clark, who had previously worked as the Factory Manager before establishing two successful butcher shops in Aberdeenshire. The firm's reputation for quality and service at McWilliams lured Robert back to the business, albeit in a different capacity as Managing Director.

The location of the premises at the heart of Aberdeen makes G McWilliam ideally placed for supplying many leading hotels, restaurants, caterers, schools and hospitals with top quality beef, pork, lamb poultry, game and cooked meats, along with a range of sausages, burgers and puddings that are all manufactured onsite.

The sourcing ethos at G McWilliam continues to be one of trying to procure as much raw material from local farms and businesses as possible. As most of their products come from farms based in the North East of Scotland, this supports their commitment to reducing food miles, and helps to support and sustain local farms around Aberdeen and Aberdeenshire.

G McWilliam are aware of their carbon footprint and currently work with industry and advisory bodies to reduce greenhouse gas emissions to zero. For example, they recently took part in a research study investigating the use of refrigeration in the Northeast of Scotland, and how it could be used more efficiently to reduce energy use and refrigerants. The researchers were also able to provide G McWilliam with bespoke recommendations and advice, which they are currently working through.

# SUMMERHOUSE DRINKS

Summerhouse Drinks was launched by Claire Rennie in 2014 and is the sister company to Walter Gregor's - Scotland's first tonic water.

Based on the family farm in Aberdeenshire where the Rennie family have farmed for four generations, Claire and the Summerhouse Drinks team are committed to using all-natural ingredients to make their handmade sodas and lemonades with many of the flavourings such as fresh mint and lavender grown in the walled garden on the farm.

The herbs are combined with natural fruit juices and slightly sparkling Scottish water for a range of lemonades that allow your taste buds to make you feel relaxed and refreshed.

The range currently includes 5 flavoured lemonades; Scottish Raspberry, Hint o' Mint, Misty, Lavender and St. Clements Orange & Lemon.

# STRATHMORE FOODS

Strathmore Foods is still a family run business with 50 years' experience of supplying their products across Scotland.

The core part of the business being ready meal manufacture with all meals now packed in fully recyclable trays following the removal of the previous black plastic trays.

Their portfolio covers a range of Scottish Classics such as Haggis, Neeps & Tatties, Stovies and Macaroni Cheese, and they strive to use local ingredients for these local products wherever possible. This includes Scotch Beef and Scottish potatoes and neeps.

The business has recently started a de-carbonisation project in partnership with external specialists. Projects include further solar panels on site, a Steam Boiler Economiser and Process Water Heat Recovery to utilise waste water from pasta cooks.

# AULDS DELICIOUS DESSERTS

The Aulds Delicious Desserts story is one of innovation and dedication, from the start over 50 years ago when they started making desserts in Hamilton, Lanarkshire. Technology, techniques, markets and even their location may have changed since then but one thing has not altered: their commitment to the finest standards in hand-crafted desserts, cakes, sweets, patisserie... and customer service.

Aulds take great pride in drawing upon skills developed and refined by generations of bakers and confectioners - it can only be through such complete understanding of the art of desserts that they can confidently and consistently come up with new ideas that their clients find so appealing.

The state-of-the-art production facility in Inchinnan, Renfrewshire is the latest chapter in the Aulds story, and represents their commitment and drive to be the UK's premiere dessert manufacturer.

# RAPSCALLION SODA

Rapscallion started life trialling fresh fruit soft drinks down an alleyway in Glasgow back in 2016. Now they have grown to a team of five supplying some of the UK's leading independent venues with their fruit to can ethos.

Their curiosity has never faltered, and they continue to test and refine their processes as they transition from handmade processes to automated production at their Innovation HQ in the Gorbals.

Rapscallion aims have never changed but they are constantly improving and refining their processes.

This year they are working closely with Scottish Enterprise and Circular Glasgow to ensure that they hit their ambitious target of Net Carbon Negative by 2025.

# HIGHLAND FINE CHEESE

Traditionally the Highlands was cattle country. Every small farm or croft had a house cow with which to supplement the tedious diet of mutton, neeps, tatties and road kill. Any spare milk was left by the range to stay warm after the cream had been ladled from the top to churn into butter. The natural cultures in the liquid would slowly eat the lactose and multiply throughout, souring it by releasing lactic acid. Eventually the milk would set and form a curd, a bit like yogurt. Then the curd would be scrambled like eggs and hung up in a pillow case or a muslin to drain the whey. Add some salt and you have the simplest preserved milk in the world - Crowdie.

With a strong cheese history running through the family, you can still find the Stone family firmly behind the reigns today. In 1994 Rory joined mum, Susannah, and his older brother in the family business of cheese-making, and has headed up the company ever since.

Minger (79551)

Now the company is focused on mould ripened cheese with brie, blue and washed rind styles. The milk comes from three farms, Sibster just west of Wick, Thrumster with a herd of organic Jersey cows and Rootfield on the Black Isle which is converting to Ayrshire cows.

Rory Stone, Managing Director

Highland Brie (43389)

# SIMON HOWIE FOODS

Simon founded the butchery business in 1986 in the village of Dunning where the business still resides today. The Howie family have been farming locally for the past 100 years which provided a terrific platform on which to set up the meat business. Simon is a butcher at heart and the love of the meat trade, and the people involved makes him passionate about moving the business forward. Seeing products that have been prepared and packed in Dunning sell to happy customers throughout Scotland gives him real satisfaction.

As a business, Simon Howie Foods are passionate about environmental sustainability and are proud to have a number of schemes in place in order to reduce the conservational impacts associated with the manufacture of their products. They have an environmental policy that is central to the culture of the business and all employees are actively encouraged to be an integral part of that culture.

Within their factory premises at Dunning, they treat all of the water on site as opposed to discharging to soak-away. They have an on-site natural spring which provides all their fresh water (30000 litres per day). This in effect means that they have a closed loop system, whereby they pump the water out of the ground and treat the outfall through ponds; these then support a mini nature reserve which in turn 'scrubs' the liquid clean before discharging to a lined Willow plantation.

Simon Howie HQ, Dunning

# SUMMER HARVEST

The Summer Harvest family have been farming the green hills of the Strathearn Valley Perthshire for over 130 years, the last fifty of them on Ferneyfold Farm just ten miles north of Gleneagles between Perth and Crieff.

Everything they need to make the perfect bottle of "Summer Harvest Cold Pressed Rapeseed Oil" is found on Ferneyfold's 400 acres - they grow all of their own crops, press all of their oil and watch every finished bottle leave by the same farm road that they use to reach the barns and the fields.

- The growing of the seed forms a complete circle on the farm:
- The seed is planted in August.
  - The bees help pollinate the flowers in April & May (it provides an early source of food for the bees and creates a wonderful thick creamy honey)
  - The seed is harvested the following August and the next crop is planted in rotation with barley (usually malting barley for the whisky industry) and wheat.
  - The seed is cold pressed on the farm where the oil is bottled.
  - The co-product from the pressing is the left-over shells of the seeds, this is called rapemeal and it is fed to the cattle that are housed in the cattle courts over the winter months. The cattle are also fed bruised barley and silage, again all grown on the farm.
  - The cattle produce dung, which is then put back on the fields to fertilise the soil and the circle starts all over again.

## SUMMER HARVEST

CODE	DESCRIPTION	UNIT SIZE	TAGS
76562	Lemon And Honey Dressing	1x1ltr	 

Lemon And Honey Dressing (76562)

Every bottle of Summer Harvest contains a little bit of Perthshire and a great deal of Ferneyfold love and attention.

Summer Harvest contain as many green credentials as possible from day one back in 2008 when the business started. Zero Waste, upcycled production units, bottle refill scheme, use of wholesalers to reduce vehicles on the road, use of PV panels for electricity.

As a business they will always look for improvements, including a phased move to LED lighting, currently over 50% LED. They are also looking at printing labels directly onto their retail bottles to reduce the use of plastic-based backing which paper-based labels come on.

Summer Harvest Farm

# NAIRN'S

Oatmeal is the core ingredient in Nairn's products, and most of the oats they use are grown and milled locally in the Scottish borders.

100% of the electricity that Nairn's use comes from renewable sources and in the last year they installed voltage optimisation units and a Solar PV array which will reduce their electricity demand from the grid by 20%.

They have set a target to reduce their scope 1 & 2 emissions by 50% by 2030 and to measure and start to reduce their scope 3 emissions. This target has been approved by Science Based Targets and is aligned to the Green House Gas Protocol target to limit warming to 1.5°C

# WE LOVE COFFEE

We Love Coffee are a proudly independent, family-owned Coffee roaster based in Glasgow. Established in 2011, they have grown to provide the complete coffee solution for businesses throughout the UK.

From 5 star hotels, leisure facilities, and contract caterers to small independent cafes and restaurants, We Love Coffee provide the solution that is right for each business. They pride themselves not only on their coffee, which is freshly roasted in-house each week but also on their customer service which has been a key part of their sustained growth.

At We Love Coffee, social responsibility is at the heart of everything that they do. They aim to be a valuable part of the local community by supporting local projects and businesses and are actively working towards B Corp certification. Their convection roaster has some of the lowest emissions of all commercial roasters on the market. We Love Coffee go above and beyond to ensure that all aspects of their business are considered regarding environmental impact. 70% of their suppliers are based within a 50-mile radius of the business and all coffee sacks and chaff (the skin of the coffee bean) are recycled.

# ANGUS & OINK

Angus & Oink began over 7 years ago after founders Scott & Malissa had spent almost a decade travelling the world with work and living and working in the Americas and Middle East. Whilst based overseas, the foodie couple took the opportunity to travel as much as they could, usually with one thing in their minds - the flavours and foods of the country they were visiting.

Angus & Oink produce a wide range of seasoning blends that cover global street food trends and barbecue. From their facility in Aberdeenshire Angus & Oink manufacture over 50 flavours that keep your catering business on trend and delivering massive flavours. A&O source from UK suppliers where possible and carry over 140 spices, sugars and salts.

They have recently moved to new 50% recycled material in their containers and work from a greenfield site where renewable energy reduces their environmental footprint.

# THE ISLAND SMOKERY

Based on the beautiful Orkney Islands in the far North of Scotland, the Island Smokery, owned and run by Callum and Fiona MacInnes, has been producing a range of smoked Orkney cheddars since 2004.

Over the years, the range has grown from two smoked cheddars, firstly with the introduction of a smoked red mature cheddar - Smokey Red, then in recent years with a selection of added flavoured cheeses. In 2017 the Island Smokery moved from its original factory to a larger unit in the nearby town of Stromness. This move has tripled the capacity and allowed them to explore new market opportunities. In 2016 the Island Smokery became one of a number of Scottish cheese producers to join the Scottish Dairy Brand group. Orkney Smokey Red became the first product to be sold to the US under this initiative and more recently our flavoured cheddars have also hit US soil.

The sawdust and wood shavings used in their smoking process are produced as a waste product by two Orcadian craftsmen.

THE ISLAND SMOKERY			
CODE	DESCRIPTION	UNIT SIZE	TAGS

80965	Smoked Cheddar Dark Island Reserve	16 x 150g	POC
10872	Smoked Whisky Cheddar	16 x 150g	POC

The cheddar is hand cut, smoked and packed in their Stromness factory. This is cut to a 225g retail pack, or in catering packs of 500g, 1.25kg and 2.5kg blocks.

Any surplus smoked cheddar is grated, mixed with ingredients and compressed into barrel shaped portions.

Their current selection includes a premium range of Highland Park whisky cheese and Dark Island Ale, both from local drink manufacturers based on Orkney.

# MADEMOISELLE MACARON

Mademoiselle Macaron started small at a farmer's market in Edinburgh in 2013. They bought their eggs at the market and would use them to make the following week's bakes so sourcing was very local.

As they have expanded, Mademoiselle have tried to keep that approach where possible, with their eggs coming Edinburgh and the Lothians.

In the last year, they have overhauled their original recipe and improved training to not only improve the quality of the product and therefore reduce waste, but to then use any waste in such a way that they can add it back into the core recipe.

Looking forward to achieving net zero, Mademoiselle hope to move away from using packaging which is made from recycled plastic to plant-based, biodegradable packaging.

# PRAVEEN KUMAR - AUTHENTIC INDIAN CUISINE

At Praveen Kumar they believe that everyone should experience good quality authentic Indian food. They are passionate about quality and provenance and all of their dishes are had cooked in small batches by the restaurant chefs using quality local produce and spices from the family farm in India. They do not add any preservatives or additives and blast freeze to lock in the freshness.

As a business Praveen Kumar are 100% committed to minimising negative environmental impact. Their frozen products ensure very little food waste due to long shelf life and ease of storage, compared to conventional chilled ready meals - both for consumers and retailers. Just-in-time manufacturing ensures that they have no wastage during production due to holding stock, and 100% recyclable packaging reduces their carbon footprint.

The purpose-built production units are part of the Perth Food & Drinks Park. The buildings were constructed with a focus on sustainability and all units are connected to the on-site solar panel plant providing affordable green energy. This, combined with transport links and location in a purpose-built production zone ensures that they minimise their local and global environmental impact.

# ISLE OF KINTYRE CHEESE

Isle of Kintyre flavour-blended cheddars were amongst the first on the market. They took great care to get their recipes right at the outset, meaning that the products have changed very little since.

Herbs, fruits and spices have been used to flavour cheese for hundreds of years. Some of the oldest recipes are still firm favourites - from chives and garlic, to mustard, cumin and woodsmoke. Isle of Kintyre take high-quality mature cheddar, add authentic flavours and press the cheese together. From traditional to exotic flavours, there's sure to be one you'll love. Try Ben Gunn or Applesmoke™ for something different.

They are often asked about the inspiration for 'Isle of Kintyre' cheese. In 1098 the Viking King of Norway, Magnus Barelegs, was granted control by the King of the Scots, King Malcolm III, of all the lands which he could sail around. He claimed Kintyre by having his ship pulled across the narrow neck of land that joins Kintyre to the mainland at Tarbert (Tarbert actually means "boat pull") whilst at the helm. The Isle of Kintyre cheese logo depicts a Viking longboat, which are still sailed annually around Kintyre.

# UPPER DYSART LARDER

The Angus farm overlooking Lunan Bay has been home to the Stirling family for four generations, and they have farmed there for over 30 years, bringing up four children and building the business.

In the early 2000s, the family started Stirfresh, washing and peeling fresh vegetables for schools and hospitals to make fresh eating easy, and, in time, also supplying retailers with 'easy veg'.

Now all four children have returned to the family business, having got stuck in from an early age and helped to grow it, and are going even further to supply tasty, honest, convenient food for busy people who want to eat well.

Their goal has always remained the same - producing fresh, quality and healthy products. Upper Dysart Larder represents not only all of this, but the family and the farm's history too.

# ARRAN ICE CREAM

Arran Dairies was first set up in the 1930s by a dairy farming family in order for them to sell their milk. The business was developed over the years and in 1999 they first started making Arran Ice Cream at the small dairy on the shores of Brodick Bay. To this day the business is still owned and run by the same family, producing ice cream using fresh, local Arran milk, collected from Tigheanfraoch Farm (the last remaining dairy farm on Arran), a short 11 miles away from their Dairy.

Arran Dairies are a carbon neutral organisation and aim to support Scotland's National Strategy to become Net Zero in their supply chain by 2035. They have made significant improvements to their operations that have delivered savings of 10 tonnes of CO2 and 500 000 litres of water in the production of the ice cream. They are already "Carbon Neutral" with offsets against the land that they own and plan to be "Carbon Neutral" without offsets by 2030 and "Carbon Net Zero" by 2035.

# A.G. BARR P.L.C

At their core is the Barr Soft Drinks business unit, established in 1875 and home to some of the UK’s most loved soft drinks brands. Whether it’s the iconic IRN-BRU, launched in 1901 and still going strong today, the vibrant RUBICON fruit-based brand or the unique range of BARR flavours, Barr Soft Drinks’ brands offer people a choice of great tasting products and bring exciting innovation to the market, available across multiple channels. Employing over 1,000 people across ten UK locations, they are proud to be a responsible business that listens to the consumers, builds lasting customer relationships, takes care of their people, values diversity, gives something back to the communities and works to minimise their environmental impact. Their values include a commitment to behave responsibly.

Barr’s responsibility agenda has always been woven into the fabric of their business and, in today’s world, as they grow and develop, it’s more important than ever that they play their part in addressing the key issues facing society, such as the need to tackle the impact of climate change.

They are pleased to report that following a full carbon footprint assessment, and aligned to the Science Based Target Initiative’s (SBTi) updated Net-Zero Standard, published in November 2021, they now have SBTi approved near and long-term science-based emission reduction targets and an SBTi verified science-based net-zero target of 2050.

Barr’s are fully committed to achieving their science-based targets, they have a deliverable and realistic decarbonisation roadmap which builds on the progress they have made and pushes further, from electric vehicles and solar panels to air source heat pumps and degasification projects. 2022 example : They are proud to have made a significant step forward in this regard with the introduction of their first 100% recycled plastic bottles. All IRN-BRU and Rubicon 500ml plastic bottles moved to 100% rPET in April 2022, supported by a high profile advertising campaign to raise consumer awareness

# THE BREADWINNER BAKERY

Established in 1973, Breadwinner Bakery has upheld the tradition of artisanal baking in Edinburgh. They are more than just a bakery; they're a journey through time, a tribute to craftsmanship, and a celebration of simple, pure ingredients.

Their master craftsmen meticulously shape each loaf of bread, every cake, and all pastries by hand, honouring the timeless art of traditional baking. They let nature work its magic, eschewing additives or artificial flavours, and bringing you the hearty, wholesome goodness of their lovingly baked goods.

Their commitment extends beyond tradition. At Breadwinner, they embrace the future, knowing that deliciousness shouldn't come at our Earth's expense. That's why the entire range is plant-based and vegan-friendly, striking the perfect balance between gastronomic pleasure and sustainability.

They are on a determined journey towards net-zero, taking concrete steps to reduce their carbon footprint. Every facet of their operation, from sourcing ingredients to baking, packaging, and delivering, is being thoughtfully optimised for minimal environmental impact. Breadwinner Bakery are not just baking bread; they're helping shape a healthier, more sustainable future, one loaf at a time.

# YESTER FARM DAIRIES

Yester Farm Dairies is run by husband and wife team Simon and Jackie McCreery, operating alongside the family farm at Yester Mains.

Once milking is finished on the farm, the milk is piped straight from the milking parlour to their modern pasteurisation plant and cheese room on-site, where an artisan range of soft cheeses, cottage cheese, yoghurts, crème fraîche, soured cream and fior di latte mozzarella are produced. The freshness of the milk makes superior products. Everything is hand-made on the family farm ensuring the freshest possible product for customers, keeping food miles low and offering full traceability.

All the cows are very important to the Dairy and are looked after well. The cows enjoy time out at grass on the lush East Lothian pastures, but they are also fed a nutritionally balanced diet which includes grass or silage (mowed grass), wheat and barley all harvested from the farm.

Attention to the cows' nutrition together with the natural pasteurisation process leads to a top quality, fresh, tasty product.

# TWO BIRDS DRINKS

Two Birds are an independent Glasgow based family business, located in the heart of the city. The makers of speciality functional drinks for busy lifestyles, and boutique fitness centred around positive well-being. Proudly independent and makers of creative fuel.

Passionate about food and drink, founder Danny combined this outlook with his love for speciality coffee when he came up with the idea of a high quality coffee drink with added health benefits. After years of mixing echinacea drops into his daily coffee, he realised this was not the convenient grab and go needed to maintain a busy lifestyle, and had the idea to chill two birds with one bean.

This drink became the Vitamin Enriched Cold Blend Coffee and Two Birds Drinks was born. Since then Two Birds have sold over 15,000 bottles, picked up over 90 stockists across the UK, and released their Vitamin Enriched Iced Mint & Green Tea.

# GALLOWAY LODGE PRESERVES

Galloway Lodge Preserves, based in the beautiful town of Gatehouse of Fleet in Scotland, is a family-run business that has been producing high-quality marmalade, jams, chutney, and condiments since 1971, when it was founded by Nigel Hesketh.

Today, Fiona and Ruaridh Hesketh lead the business, with the help of a dedicated team. They take pride in using only the finest ingredients and traditional methods to create their preserves, ensuring that every jar is of the highest quality. Their authentic taste and unparalleled quality have earned the business numerous awards and accolades, recognised by industry experts and satisfied customers alike.

# PLANET KUKU

Planet Kuku's plant-based 'kukus' are similar to a frittata. Inspired by a traditional Iranian recipe, they combine fresh veg, herbs, Scottish rapeseed oil and chickpea flour in a product that is 100% yummy and good for you.

From testing recipes in their own kitchen, to running successful stalls at Edinburgh's bustling food markets, Planet Kuku has always been passionate about making delicious, healthy and exciting food. Food that is going to help save the planet.

They are a living wage employer using 100% renewable electricity and source as many of their ingredients locally as they can. Every kuku is lovingly hand-mixed, baked and packaged in the Edinburgh kitchen.

Whether your customers are flexitarian, vegan or looking for something delicious, they'll love these plant-based kukus, burgers and bites.

# STOATS

From the early days of making porridge in their food truck for festival goers, to running their bustling bakery in Edinburgh today, Stoats have remained proudly independent and committed to bringing customers simply made, honest, delicious food. Now producing a range of porridge quick pots and porridge oat bars bursting with fibre and flavour.

Green isn't just Stoats favourite colour, it's also their mindset. All of their products are made with wholegrain Scottish oats and you'll find British butter in their bars (or coconut oil in the plant-based bars). Their bakery recycles 97% of their waste and this now includes disposable PPE such as hair nets and beard snoods that often go into general waste at food manufacturing sites.

80% of ingredients in a Stoats porridge bar come from the UK. They have a shredder that turns used corrugated boxes into packing material to keep orders safe when delivering to their customers. They have a pollination highway of wild flow planting around the site so bees can have a pit-stop on their journey. Stoats are also investing in changes in their lighting system and investigating alternative energy sources to implement in 2024.

# MOSSGIEL ORGANIC MILK

Mossgiel Organic Farm in the heart of Burns country, Mauchline, has a passion to change Scottish Dairy for a more sustainable future from the soil up!

Working with 5 other Scottish Organic Farms in the South West of Scotland through the farming co-op 'OMSCO' to produce a very unique 100% organic, non-homogenised, brewed milk with ZERO single use plastic.

- Here's a snippet of Farmer Bryce's Mossgiel milestones:
- 7th March 2016 - First bottle of Mossgiel Milk.
  - 1st July 2016 - Farm detox began for Organic conversion.
  - 1st July 2018 - Certified Organic, Mossgiel Organic Milk.
  - 31st July 2018 - First milk delivery received from Osliebrae Organic Farm.
  - 1st November 2018 - Heat recovery system installed.
  - 25th January 2019 - First dairy in the UK to be 100% single-use plastic FREE.
  - 30th April 2021 - First electric vehicle joined the fleet.
  - 15th October 2021 - Biomass boiler installed.
  - 1st June 2023 - Solar panels installed.
  - June 2023 - Over 17 MILLION pieces of single-use plastic SAVED from landfill by using reusable containers.
  - December 2025 - To become carbon neutral.

# PAISLEY DRINKS COMPANY

The story begins in the 1980s when founder, Brian, first developed a love of soda. As a weekend treat, his grandparents took him to the local café where he drank real soda through a straw from a glass bottle, just like he'd seen in the movies. Later on, with emerging quality products in craft beer and gin, Brian saw that soda had been left behind. Stripped of its natural ingredients, his beloved childhood soda had become - and remained - chemical fizz. So he decided to create his own premium range of craft soda.

In his home town of Paisley, renowned for innovation and now being reborn, Brian set up a new drinks company, devoted to sourcing the best natural ingredients and experimenting with real fruit flavours.

Today the range of delicious, high quality, craft sodas, offers people a refreshing and healthier alternative to the traditional brands, as they continue to lead the way in the Real Soda Revolution.

# TAZA BAKE

Taza Bake is the first Arabic/Syrian flat Bread manufacturer based in Scotland. They are a family business and began operating in 2015 from Edinburgh city using a fully automated production line.

Deliveries are now made all over Scotland, North of England and the Midlands, producing fresh flat bread and Pita Bread to customers on daily basis.

Using a very old traditional recipe, Taza Bake's bread is made fresh, chemical-free and no additives with a shelf life up to 14 days. The bread can be used with dips, for wraps and as a light snack as well.

Taza means Fresh, and that is their the aim, to deliver a freshly baked product on a daily basis.

# SCOTCHIP

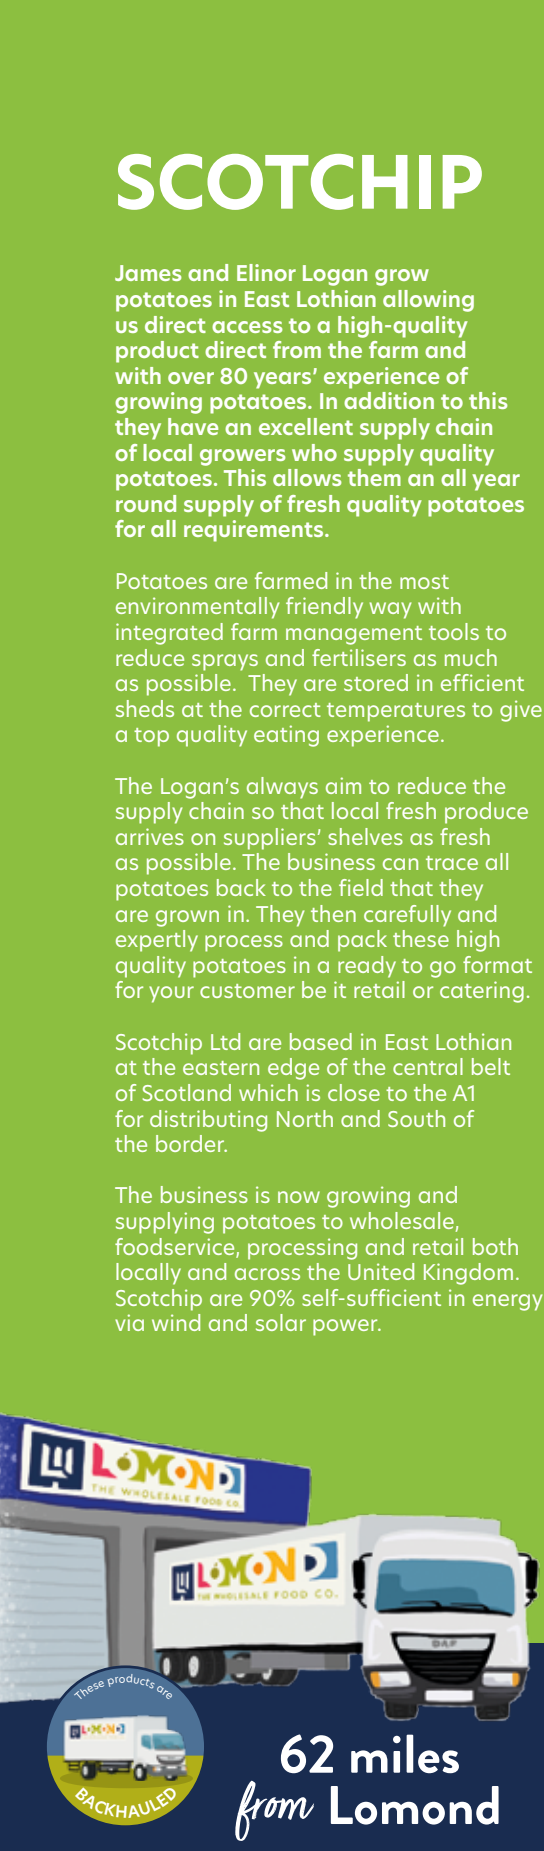

James and Elinor Logan grow potatoes in East Lothian allowing us direct access to a high-quality product direct from the farm and with over 80 years' experience of growing potatoes. In addition to this they have an excellent supply chain of local growers who supply quality potatoes. This allows them an all year round supply of fresh quality potatoes for all requirements.

Potatoes are farmed in the most environmentally friendly way with integrated farm management tools to reduce sprays and fertilisers as much as possible. They are stored in efficient sheds at the correct temperatures to give a top quality eating experience.

The Logan's always aim to reduce the supply chain so that local fresh produce arrives on suppliers' shelves as fresh as possible. The business can trace all potatoes back to the field that they are grown in. They then carefully and expertly process and pack these high quality potatoes in a ready to go format for your customer be it retail or catering.

Scotchip Ltd are based in East Lothian at the eastern edge of the central belt of Scotland which is close to the A1 for distributing North and South of the border.

The business is now growing and supplying potatoes to wholesale, foodservice, processing and retail both locally and across the United Kingdom. Scotchip are 90% self-sufficient in energy via wind and solar power.

# TAYLORS SNACKS LTD

The Taylor family has farmed the land in the Errol area for around 100 years, spanning four generations. Taylors Snacks Ltd were formerly known as Mackie's at Taypack and have been producing crisps for 15 years. Now solely under the Taylor family ownership they are diversifying into popcorn healthier snacking.

Taylors have recently re-launched their entire range in new Taylors branding, and have reduced the amount of plastic in their packaging by 10%, and also are sourcing packaging from firms using plastics from recycled oils.

# ISLE OF MULL COFFEE

Susanne, an IT trainer for many years, interspersed with raising a family, riding horses and helping to build a holiday property on Mull, first fell in love with the Isle Mull in her teens. After visiting for the Mull Car Rally for many years Susanne decided that she wanted to be based on the island. The opportunity came to renovate an old council depot and the idea of coffee roasting bounced into her head whilst on a quad bike looking down the old drovers road at Mam Clachaig on one of those rare sunny summer days. She was off - needing an enthusiastic business partner and friend Susanne asked Nicki to join her.

Christmas 2021 saw Nicki hand in her notice of intention to retire. Trying to do everything was taking its toll and she had lost her joie de vivre for teaching. Nicki always said that it was not about the money for but about contributing to a community which she was increasingly becoming disengaged from. Nicki has had many different careers in her life time - from horses to hotels, farming to business marketing and event management - so when you Susanne asked to join her in the coffee adventure on beautiful Mull she accepted with alacrity, looking forward to a new adventure.

# SRUC

Scotland's Rural College (SRUC) was established in 2012 through the merger of the Scottish Agricultural College (SAC) with Barony, Elmwood and Oatridge Colleges.

Six campuses, eight farms, 25 consulting offices, eight veterinary practices, six research centres. 5000 students, paving the way for the future of the agricultural sector.

Creating and mobilising knowledge and talent. Partnering locally and globally to benefit Scotland's natural economy. Education, research, and consultancy (through SAC Consulting) at SRUC grows the natural economy.

A natural economy fuelled by responsible use of the world's natural resources: people, land, energy, water, animals and plants. By working in partnership, we focus on solving the "wicked challenges" facing the planet, including climate change, biodiversity and access to nutritious food and clean water. By focussing on the sustainable natural economy, SRUC will strive to lead the way in delivering economic, social and environmental benefits for all, in Scotland, and beyond.

# RORA DAIRY

Rora dairy produces a range of pure Scottish yoghurts on their organic family farm in Aberdeenshire. It was established in 2017 by Jane Mackie and her husband Bruce.

The yoghurts are made with organic milk and live culture in small batches, without the addition of unnecessary sugar or additives. They use a range of Scottish fruits to flavour the yoghurts, reducing the company's carbon footprint. All the milk used in the yoghurts is from the farm's free-roaming, grass-fed cows.

Sustainability is at the heart of the brand with the development of new woodland areas and the use of wind and solar power.

Rora offers seven different flavours of live yoghurts, ranging from its award-winning Natural Live Yogurt to Scottish Strawberry and Scottish Honey, using produce sourced from Scottish farms/suppliers.

The farm is always working on improving its carbon footprint with every new machine purchased and more and more feed being grown on the farm, to reduce the need for imported feedstocks and reduce their carbon footprint.

Rora dairy is continually looking at how to reduce its electricity consumption through improved production processes.

# DEAN'S OF HUNTLY LTD

Dean's of Huntly's story begins in 1975 at the heart of Helen Dean's kitchen, in the small town of Huntly, North East Scotland. It was here that Helen first created her delicious traditional shortbread, and her friends and family loved the 'melt in the mouth' sensation. Her husband Bill, a Drum Major, thought it was so delicious he decided to use Helen's baking to help raise funds for the local Huntly pipe band.

Their touring helped spread her shortbread's fame far and wide, and soon, the aroma of home baking would fill the town as Helen established her own small bakery to meet demand. Helen's light and crumbly shortbread was so popular that in 1992, they moved from a shop in the centre of the town, to a new purpose built bakery on the outskirts of Huntly. The bakery looks much bigger, but they have been at this bakery ever since and still baking Helen's melt in the mouth shortbread, just on a slightly bigger scale!

Dean's remain a family run business and are incredibly proud of the fact that they use time honoured hand crafted baking methods. Today Dean's are recognised as 'A Leading Premium Quality Scottish Shortbread'.

# ARTISAN CHEESECAKE

Artisan Cheesecake are a small family business established in October 2013 in their first bakery/shop in Bathgate.

In 2017 the business upscaled and moved to their current Livingston bakery, which gave them the opportunity to expand the variety of products that they produce. As well as a selection of cheesecakes, Artisan now produce brownies, traybakes, cookie pies, meringues and bagels.

In 2019 they stopped using plastic cake packaging and moved to recyclable boxes. This year has seen them move towards sourcing as many Scottish ingredients as possible.

# DUNCAN FARMS

Duncan Farms is Scotland’s fastest growing egg business focused on producing truly traceable, sustainable eggs. Based in the North East of Scotland, the family farming business has a fully integrated approach to egg production, from in-house rearing and laying to grading and packing.

Every step of the process is carefully managed to produce premium quality, nutritious eggs. Promoting true traceability, Duncan Farms enables every egg to be tracked back to the farm. Free range farms are not only designed to encourage hens to range and forage but also to boost biodiversity.

A field to fork model is achieved with sister business, A J Duncan, which farms over 7,000 acres of arable cropping, producing high-quality, local feed for their growing flock.

Laying and rearing farms also benefit from integrated renewable energy solutions including wind, solar and biomass ensuring sustainably produced eggs.

# JUST: GLUTEN FREE BAKERY

Founded in 2013 by Ronnie Stebbings, Gordon McGhee and David Beattie, GDR Food Technology supplies major retailers, food service and online shopping customers with products free from all of the 14 major allergens and approved by the Vegan Society and Coeliac UK.

They moved to a purpose-built facility in April 2019 which is BRC AA accredited and employs 38 staff, including an Energy Efficiency Team. The site is fitted with LED throughout as well as motion detection sensors to help further improve energy efficiency.

All plastic packaging is separated from cardboard and both are recycled. 100% of food waste is recycled and turned into animal feed.

Since 2022 GDR have become part of the Dr. Schar family.

# GLESQA ROASTERS

Glesga Roasters believe coffee should taste good and do good.

Every time you brew a cup, you're part of a social enterprise that changes lives globally and locally. You become part of the story that contributes to the future of those in need of a fresh batch of hope. The team at Glesga Roasters know you get all the 'buzz' words: sustainable, ethical, single-origin, artisan. They are committed to it all because they are committed to loving people.

Direct sourced beans, hand-picked in Rwanda means dignity as well as quality. Local farmers are able to build medical centres and houses, install solar panels, send their children to university and invest in credit savings funds. When you buy Glesga' Roasters coffee you honour those workers, and the whole population benefits.

Here in Glasgow, people on the journey of rehabilitation and recovery are growing in purpose, hope and belonging. Coffee roasting has created opportunities for training and mentoring within a socially relevant industry, building confidence and job readiness in their roasters.

You are part of the story of these farmers and roasters, simply by enjoying their exquisite coffee!

Your purchase. Our precision. Their future.

# SCOTTISH BUSINESSES SOURCING BEYOND SCOTLAND.

Although we are passionate about sourcing our products locally, we are aware this isn't always possible. We work with some fantastic Scottish businesses who source or manufacture their products further afield and work hard in other areas to reduce their environmental impact. This section of our guide features more information on those businesses.

## ARISTON

Over 10 years ago, when Lefteris Amourgianos was a student in Heriot Watt university, he realised that he felt homesick and really missed authentic Greek food. Not long after, the idea of a company that would import Greek food to Scotland dawned on him, and thus, in 2014 Ariston Foods Ltd was created!

It all started with the import of traditional handmade Greek pies from one of Greece's best suppliers. Kicking off with clients like the very university he studied at, Heriot Watt, and steadily expanding the company's clientele, Lefteris saw Ariston Foods Ltd grow bigger every year.

The demand in Scotland for quality Greek food led to the opening of two cafes in Edinburgh by 2019 - Greek Artisan Pastries, powered by Ariston Foods Ltd.

As the years passed & Greek food became even more popular, the company started gaining more customers, moved to larger facilities in Livingston, where it still operates from, and expanded the team. They currently stock over 300 different food and drinks, from gyros, feta cheese, olive oil, pastries and legumes, to desserts, deli products, wine and beer, all made in Greece and imported directly from the suppliers.

Fast forward to today, Ariston Foods Ltd has a long list of customers from local cafes to well-known restaurants located across the UK, in Scotland, England and even Northern Ireland.

# IO FIBREWATER

There's something special in this water...Introducing ió fibrewater, the 2023 Best Drink Innovation Award winner and the UK's first prebiotic fibre-infused water. Each bottle delivers 20% of your daily fibre intake and it is scientifically proven to nourish healthy gut bacteria and support gut and overall health.

ió fibrewater is a refreshingly delicious, perfectly clear water made with only the finest naturally sourced ingredients and a splash of fruit flavour and has no added sugar.

Friends and founders Jay, Aly, and Mohs developed this innovative water after discovering their shared challenges with gut health. They found that prebiotic fibre takes the health benefits of dietary fibre to the next level, and it is the cornerstone of good gut health. After their own incredible and positive experiences with prebiotic fibre, they said, 'We need to bottle this!'. So, they did.

ió fibrewater is part of Edinburgh-based The Prebiotic Company Ltd. and was launched in May 2022, earning multiple awards for innovation and excellence, including the Scottish Edge Wild Card Award.

ió fibrewater is an innovative way to increase fibre intake, support gut health, and enhance overall wellness - backed by science with a Glasgow Caledonian University study and two authorised UK & EU health claims. Plus, it tastes great!

# MILLS MILK SCOTLAND

Mills Milk are a family run business that have been in the Scottish dairy industry for nearly 100 years. Originating on the Isle of Arran, they relocated to the mainland in the 1950's.

Current director Alastair Mills and son Adam Mills both live on sight, in their new home in the Ayrshire hills.

Alongside their dedicated team they work together to ensure the hospitality industry and home delivery customers in Scotland receive the best possible customer service and competitive pricing.

This year they have purchased a fleet of electric vehicles to help lower their carbon footprint and help them reach their goal of net zero.

With the nationwide love of glass bottled milk and friendly milkmen making a comeback, Mills Milk help save over 2,000,000 pieces of single use plastic being used each year.

This number grows with every new home delivery customer that joins them, and their recent purchase of an Inverness business means they are now reaching homes as far north as Invergordon in the highlands.

# NUISANCE DRINKS

A range of sparkling botanical soft drinks that celebrate the wild side of nature.

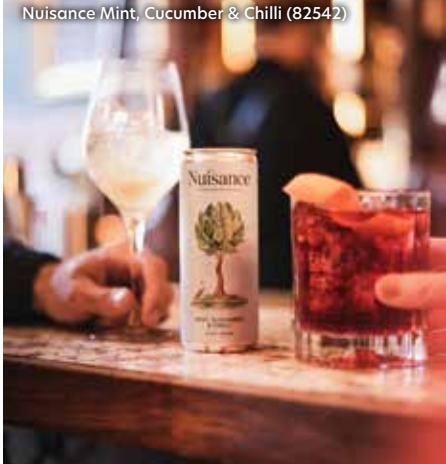

Natural flavours, low in calories and with no artificial sweeteners. Nuisance was born in 2020, when founder Hugo, swapped his city desk for gardening gloves. Armed with his mum's recipe and a pocket full of dock leaf, he spent lockdown foraging nettles before launching their trademark Wild Nettle soda. They turn the unsung heroes of the hedgerow, often considered a nuisance, into daringly delicious drinks. Nuisance donate 1% of sales to Rewilding Britain.

## CONDITIONS OF SALE

Goods covered by the invoice remain the property of Lomond Fine Foods Limited until all monies owing by the purchaser to Lomond Fine Foods Limited have been settled.

## TERMS:

STRICTLY NETT CASH - Unless otherwise agreed.

## PAYMENTS:

Our official receipt is the only recognised discharge of accounts unless payment is made by cheque. Orders for goods on a sale or return basis cannot be entertained.

## LATE PAYMENT:

We reserve the right to charge interest on all payments not affected by the due date plus a late payment charge in line with the "The Late Payment of Commercial Debts acts 1998, 2002 & 2015". We reserve the right to make a charge for any payment received which does not successfully clear through the banking system in the first instance. All legal and collection costs will be payable by the purchaser.

## AVAILABILITY:

All good listed are offered subject to availability and prices are subject to change without notice.

## WARRANTY:

The goods listed are guaranteed to be, when delivered, of the nature, substance, and quality therein described, and to comply with Food and Drinks Act and all other statutory requirements or regulations relating to the sale of food and liquor. We cannot accept responsibility for defects caused to the pack or contents occasioned after delivery by unsatisfactory handling or storage in unsuitable conditions.

## CLAIMS:

All goods must be examined at the time of delivery and a clear signature must be given. Any losses or damage must be stated on delivery document and packing material retained for inspection. Unless the above conditions are observed we cannot consider any claims for breakages, shortages or non delivery. Any claims regarding the condition of goods must be made within 24 hours of delivery.

## V.A.T.:

V.A.T. charged as per rate applicable at the time of invoice.

Halal Statement: the halal symbol signifies that the meat specified is halal certified. Halal certificates are available on request.

\*some images are for illustrative purposes only.

All information throughout the brochure is correct at time of print.
